

YOUR DIABETES JOURNEY

Managing Your Diabetes

There are lots of ways to manage your diabetes.

You might prick your finger to read your blood sugar levels or use a continuous glucose monitor (CGM).

You might take your insulin through injections (shots) or you use a pump.

Whichever way you take control of your diabetes is up to you, your parents, and your endocrinologist.

Camp Kudzu educates, inspires and empowers you on your journey with diabetes!
